SUMMARY

Product-minded Software Engineer who builds consumer products from idea to launch, combining product thinking, UX/UI, architecture, and engineering. I've independently built three iOS and Android products while working as a Senior JavaScript Engineer for large Japanese enterprise clients.

SELECTED PROJECTS (More projects at [my website](#))

[Arbor: Daily Affirmations](#) — iOS & Android

July 2026

Daily nature-themed affirmations and guided meditation. Built independently across product concept, Figma UI, architecture, Flutter development, monetization, and store release.

[Grocery Reminder - Stoku](#) — iOS & Android

App Store Review

Offline-first grocery inventory and shopping-list app. Built independently with SQL/Drift, covering product concept, Figma UI, architecture, Flutter development, monetization, and store submission.

WORK EXPERIENCE

AsiaQuest Indonesia

November 2023 – Present

Senior JavaScript Developer

Jakarta, Indonesia

- Translate client requirements into maintainable software solutions for large Japanese enterprise clients, balancing user needs, technical constraints, and existing architecture.
- Design and implement client-specific interfaces and workflows using JavaScript/TypeScript with Vue.js and React.js integrations.

Middle JavaScript Developer

Jakarta, Indonesia

- Delivered Kintone customizations and enterprise solutions for Japanese clients using JavaScript/TypeScript.
- Adapted solutions to varied business requirements while maintaining existing production code.

Qios Teknologi Indonesia

March 2023 – November 2023

Android Developer

Jakarta, Indonesia

- Developed a multi-purpose Flutter kiosk app for restaurant ordering, gym payments, and hospital billing.
- Designed user-centered flows and integrated secure payment gateways.
